What the Local Authority and/or schools do with pupils' and children's data

The **Local Authority (LA)** uses information about children for whom it provides services, to enable it to carry out specific functions for which it is responsible, such as the assessment of any special educational needs the child may have. It also uses the information to derive statistics to inform decisions on (for example) the funding of schools, and to assess the performance of schools and set targets for them. The statistics are used in such a way that individual children cannot be identified from them.

Since the implementation of the Education and Inspections Act 2006, and specifically the duty for local authorities to provide a sustainable travel to schools strategy, North Somerset Council has been involved with assessing pupil travel needs and reviewing transport infrastructure to all its schools. School mode of travel information, collected as part of the DfE School Census, is shared with the School Travel Advisers in the North Somerset Council Sustainable Travel Team.

The Local Authority will use information about its school workforce for research and statistical purposes, and to evaluate and develop education policy and strategies. The statistics are used in such a way that individual staff cannot be identified from them. The LA may also use it to support and monitor schools regarding sickness and recruitment of staff.

Primary Care Trusts (PCT) use information about pupils for research and statistical purposes, to monitor the performance of local health services and to evaluate and develop them. The statistics are used in such a way that individual pupils cannot be identified from them. Information on the height and weight of individual pupils may however be provided to the child and its parents and this will require the PCTs to maintain details of pupils' names for this purpose for a period designated by the Department of Health following the weighing and measuring process. PCTs may also provide individual schools and LAs with aggregate information on pupils' height and weight. The LA may supply pupil details to assist with National Immunisation Programmes.
